Series 200 Product Information *decorative walls, planters, curbs & park benches*

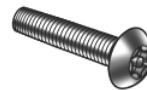

Our low profile Series 200 skateboard deterrent can be used on walls, planters, and park benches.. The series 200 is our most popular design, because it is completely rounded and bull nosed therefore limiting the inconvenience to the general public. They are mounted by drilling two holes for the two anchors and screws. Every one of Stop A Grind's deterrents are custom machined from a solid block of aluminum. This allows us to match any contour you may at no additional cost to you. For your convince we do offer the fasteners. Also If you are looking for a special color we do offer an anodizing option.

Product Specs:

- ALUM.
- Length 3.0"
- Diameter 1.0"
- Screw size 1/4-20

Concrete single expansion anchor

Tamper resistant 1/4-20 screw

Tamper resistant hex bit

INSTALLATION AS SIMPLE AS 123

- Drill two holes 1/2" diameter into the base material to a depth equal to, or slightly deeper than the length of the expansion shield.
- Place the Single Expansion anchor, nut end first, into the hole. The top end of the anchor should be flush or slightly below the base material surface.
- Place the object to be fastened over the anchor in the base material and bolt into place. The bolt should engage 2/3 of the threads of the anchor.
